

# Compact To Full-size Air Conditioners

1600-8500 BTU/Hr. (469-2490 Watts)

**PROAIR™**  
The Ultimate Line

**CR29**

**CR43**

**CR23**

## Features

- Stock models include thermostat control and EMI/RFI noise suppressor. UL/CUL listing is standard on CR23, CR29 and CR43 stock models.
- The ProAir™ Series combines state-of-the-art design with pleasing aesthetics. This highly efficient series offers a broad range of sizes and performance capacities.
- For more sophisticated requirements we offer Levels II and III Smart Control. This microprocessor-based option provides programmable temperature management, digital display of enclosure temperature, as well as remote alarm capabilities. (See page B.48)
- Maintenance is made easy by front cover hinging open for quick access to all components.
- The Flip Filter design on the CR23 and CR29 uses only 50% of the filter surface so filter can be inverted to double operating time between cleanings/replacements.
- EZ Mount flanges simplify installation to a two-step, one-person job.
- Filterless operation possible in many applications.
- Unique condensate management system evaporates moisture from enclosure and eliminates drain tubes, buckets and wet floors.
- High performance fans and blowers are ideal for densely packed enclosures.
- 100% functionally tested.
- Mounting hardware, gaskets, drawings, mounting template and instruction manual furnished.
- All units use a CFC-free or environmentally safe refrigerant.

**TYPE 12/3R** **RoHS**

UL TYPE 12/3R approval is standard on all stock models. UL/cUL listing available on most models. (UL File SA6453)

## Other Units To Consider

- CR23: CR23 Stainless Steel, pg. B.21; Genesis™ M17, pg. B.7  
 CR29: CR29 Stainless Steel, pg. B.21; Genesis™ M28, pg. B.11  
 CR43: CR43 Stainless Steel, pg. B.21

## Option Packages (see pgs. B.47-B.48)

Harsh Environment Package*	✓	✓	✓
Stainless Steel Package	See pages B.21-B.24		
Heater Package	✓	✓	✓

\* Please refer to pages B.21-B.24 for our air conditioners that have been engineered and manufactured specifically for demanding applications.

## McLean Thermal Closed-loop Cooling

Within the air conditioner, the recirculated clean enclosure air is kept separate from the ambient airflow system. This protects the electronic controls and prevents shutdowns caused by heat, humidity, dust and other contaminants.
